There is no substitute for quality

Hybrid TWISTER

„Resistance is pointless“

Experience a completely new sensation when removing callus with the new hybrid grit!

Two exceedingly effective materials - diamond and ceramic - combine to yield a progressive new hybrid grit.

The **Hybrid** TWISTER's rate of removal will astound you.

Despite the finer hybrid grit, you can work more quickly and at the same time obtain a smoother surface; an advantage for user and patient.

The **Hybrid** TWISTER is a medical device which can be used in both the wet and the dry technique and incorporated into the conditioning process without difficulty.

A superb innovation made by specialists; „made by Busch“.

NEW

European-Patent-No. 1157627
Utility Model No. 202013006268.1

Hybrid TWISTER - a new experience when working on callus

The combination of diamond and ceramic as premium abrasives together with the tried-and-tested TWISTER design make the Hybrid TWISTER a high-tech product for modern callus treatment.

BUSCH manufacturing quality

- + Diamond abrasive for a longer service life and higher cost-efficiency
 - + Ceramic abrasive for a higher rate of removal and smooth surface, also saves time
 - + TWISTER design for an optimum cooling in the wet technique and higher suction in the dry technique
- = **Hybrid TWISTER** the new high-tech product

The **Hybrid TWISTER** is immediately identified by its white ring; the fine hybrid grit is identified by an additional red ring, medium grit by a blue ring and the coarse grit by a green ring.

Coarse hybrid grit • for removing thick callus

BUSCH	HT6880	HT6880	HT6880		HT6854R	HT6854R
Ø ISO	080	100	120		100	120

Medium hybrid grit • for removing hard callus

BUSCH	HT880	HT880	HT880		HT854R	HT854R
Ø ISO	075	095	115		095	115

Fine hybrid grit • for removing incipient callus

BUSCH	HT8880	HT8880	HT8880		HT8854R	HT8854R
Ø ISO	075	095	115		095	115

We recommend manual cleaning with a brush (BUSCH 9736/140) and ultrasonic device. Please use the usual speeds.
